CITE TEXTILE MANUFACTURE IMPROVEMENTS

SPEED UF TEXTILE PRODUCTION - Berlin, Nachrichten fuer Aussenhandel, 27 Jan 51

New operating methods introduced in the people-owned Zittau Textile Mills enable a single spinner in the sewing thread shop to service 2,100 spindles; in the textile-yarn factory one worker can operate 1,800 spindles. All incidental functions are carried out by apprentices. The machines have been improved to increase the capacity of the twiners, who in some cases now service up to 3,200 spindles. A 15-percent increase in cutput is planned.

INCREASE OUTPUT OF TEXTILE MILLS -- Berlin, Nachrichten fuer Aussenhandel, 14 Feb 51

The VEB Feinspinnerei (spinning mills) Burgstaedt in Sachsen will increase . the number of its spindles to 52,000.

The Goerlitz and Oberlausitz cloth factories are to be amalgamated and production increased to the prevar level.

The Wilhelm Pieck synthetic fiber mill in Thueringen is scheduled to produce a gabardine thread from cellulose, mainly for export.

ADOPT KOVALYOV METHOD -- Berlin, Taegliche Rundschau, 25 Mar 51

The Kovalyov method has been applied successfully in the apprentice shop At the Forster Worsted Mills.

method was first tried out by the master weavers who are responsible for training apprentices. They were able to reduce the time required to change shuttles from 1.8 to 1.5 seconds. Apprentices succeeded in further reducing this time to 0.8 second.

RAISE SILK PRODUCTION -- Berlin, Nachrichten fuer Aussenhandel, 31 Jan 51

The yield of raw cocoons in the German Democratic Republic was stepped up from 15,500 kilograms in 1949 to 23,000 kilograms in 1950. The cocoons are shipped exclusively to the Central German Spinning Mills in Plauen, Vogtland, where they are converted into silk for the manufacture of bolting cloth.
